

ISMATEC®

Born from Swiss precision & German engineering

Pump with precision with flow rates as low as 0.0007-mL/min

In Fluid Handling, the pump is often one of the most critical components of the entire fluid pathway. What most pump operators need is an easy-to-use, reliable product that delivers fluid accurately day after day, so they can focus their time on more complex matters.

Well-known for more than 50 years for precision fluid handling, Ismatec® pumps are a recognised leader in peristaltic pumps.

All Ismatec® pumps are born from Swiss precision and German engineering for clockwork-like accuracy; manufactured according to strict ISO 9001:2008 standards and are CE compliant. Build your own customised peristaltic pump by selecting a separate drive, pump head components, and tubing.

You can also select a complete system. Either way, Ismatec can provide you with a reliable solution to your fluid handling needs.

The Ismatec Range

Reglo ICC

Reglo ICC 3-Channel Pump

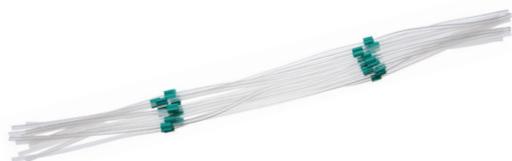

Digital peristaltic pump with independent multichannel control & easy to remove cartridges for bidirectional fluid transfer.

IPC-N Pumps

IPC-N Multi-Channel Pump

Low-speed digital peristaltic pump with Click-‘N’-Go cartridges and planetary drive for less pulsation & longer tube life.

2 & 3-Stop Tubing

3-Stop Tygon Tubing

Designed for optimal operation in Ismatec® pumps with a choice of formulations and colour-coded for ease of use.

About us

Cole-Parmer is a leading global source of test & measurement, life sciences and fluid handling products, instrumentation, equipment and supplies. We are proven experts in the fields of temperature measurement and control, electrochemistry and chromatography. Our portfolio of unique industry-leading brands includes Argos Technologies®, Electrothermal®, Environmental Express®, Ismatec®, Jenway®, Kinesis®, Masterflex®, PCRmax®, Stuart®, Techne®, TELOS®, Traceable®, VapLock™ and a wide range of private-label products.

MASTERFLEX®

Tried, Tested, and Trusted Worldwide

The preferred pumping solution for the lab or processing industry

In Fluid Handling, the pump is often one of the most critical components of the entire fluid pathway. What most pump operators need is an easy-to-use, reliable product that delivers fluid accurately day after day, so they can focus their time on more complex matters.

Only Masterflex Peristaltic Pumps offer unparalleled and standard-setting reliability—performance produced by more than 60 years of manufacturing peristaltic pumps. Masterflex Peristaltic Pumps offer flow rates as low as 0.00001 mL/min to 42 LPM and are able to generate pressures up to 10 bar (150 psi). They are easy to use and, in most cases, can be installed within minutes.

With a few moving parts, they are also easy to maintain. With many tubing formulations available, you can ensure compatibility with an extensive variety of fluids. From low-cost fixed-speed pumps to advanced remote-controlled models suitable for critical metering and dispensing applications, we can provide you with a tubing pump solution.

The Masterflex Range

MasterflexLive™

MasterflexLive™ Stainless-Steel Process Pump with Cytotflow Pump Head

MasterflexLive™ gives you remote real-time control of all pump parameters, whilst push notifications alert you, so that critical pump processes can be adjusted 24/7.

Masterflex Pump Head

L/S® Easy-Load® Pump Head

The variety of pump heads available and include standard, cartridge, Easy-Load® & high-performance, allowing fluid transfer across all flow rates and pressure ratings.

Masterflex Tubing

L/S® High-Performance Precision Puri-Flex™ Pump Tubing

22 formulations are available in a variety of sizes & are precision extruded to improve pressure generation, suction lift, ability to pump viscous fluids & tubing life.
